

Wells has the highest reputation for structural quality and integrity in learning institutions, providing safe learning spaces. With our ability for year-round construction and fast-track building methods, Wells ensures projects are completed on-time and within budget so classes, sporting events and other programs can continue as scheduled.

Precast Advantage

Wells is at the head of its class when it comes to school design and constructing teaching facilities, sports complexes, classrooms, dormitories, gymnasiums and swimming pools, auditoriums and other education-related structures.

- **Aesthetic Versatility**
A variety of surface textures and finish options help meet unique design requirements, such as matching an existing structure
- **Structural Strength**
Load-bearing panels leave interior spaces with unobstructed views for arenas, auditoriums and lecture halls
- **Accelerated Construction**
All-weather construction allows the structure to be erected quickly, year-round
- **Energy Efficiency**
Thermal performance of insulated wall panels results in reduced heating and cooling costs
- **Reduced Life Cycle Costs**
Low maintenance and durability of precast allows the structure to stand the test of time; the average building life span is over 100 years
- **Safety**
Fire, mold and pest resistant; protects from harsh weather and creates a safe storm shelter in emergencies
- **Noise Reductions**
Quiet environments and excellent sound absorption compared to other building materials

Protecting life's most precious assets

Thanks to its unique and resilient structural integrity, Wells building solutions offer a greater level of safety and protection against extreme weather such as tornados, hurricanes and other emergencies, customizing unique and aesthetically pleasing spaces to meet your needs within both new and existing structures.

- Solid, windowless panels for safer gathering
- Withstands winds up to 250 mph
- Rated for 2-hour fire resistance
- Available in a variety of architectural finishes and graphic concrete

The Wells Difference

We aim to collaborate from conception to completion to bring your vision to life, offering flexibility of design to fit an institution's changing needs, today and in the future.

We do this by keeping the entire life cycle at the forefront when building a structure. Our collaborative approach can:

- Compress schedules and reduce costs
- Reduce owner risk
- Deliver cost and schedule certainty
- Optimize design for prefabrication and efficiency
- Accelerate the design-build process
